## REACH Restriction Procedures for the Handling of Diisocyanates (Hardener for hard foam ECOLINE / ZEL / ASTI OP Comp. B)

Without a certified training, the handling, processing with and of diisocyanates is prohibited from 24.08.2023. The REACH regulation stipulates that the placing on the market, dispensing and further use of products containing diisocyanates is only permitted after successful training. Industrial or professional users must be trained on occupational safety, handling, workplace exposure control and personal protective equipment before handling diisocyanate products.

The test certificate is valid for 5 years and must then be renewed.

For further information, please see the attached information sheet.

Thank you very much.

## Delivery problems

### Staple Remover Klamex

Unfortunately, the special raw material for the production of the Klamex staple removers and the replacement blades is still not available. It is also not foreseeable when the material will be available again.

### Company nora® moulded parts

The nora® company has also had delivery problems with moulded parts for some time.

### Wooden nails

Our supplier informs us of the following regarding the missing wooden nails:

*- „Unfortunately, we have not been able to produce wooden nails for shoes until now. We regret that we cannot deliver the goods and cannot give you a date. Our capacities are fully utilised with the production of polishing woods. The production conversion to shoe nails requires considerable effort and cannot be carried out at present. “ -*

## Hints

Art.-no.	The following articles we had to with drawn from our product range:
10557366008	VIBRAM HEELS ART. 1105, SIZE 43/44, BLACK AA
15725005008	FATO GRINDING WAX MIDDLE BROWN
45004023014	COLASTOCORK 10 MM
50229305002 + 50229305004	AWUKO SU 42 Y 35 MM CURVED DENSE K 24 AND K 36
65211295002	HOOK AND LOOP FASTENER 38 MM RO A 10 M, BLACK
80185200012	RENDENBACH ZAHMVACHE LEATHER SOLES KH 46/47, 5,0 – 5,4 mm
82110000014	EP ZAHMVACHE BEND, 1. QUAL. 5,0 - 5,4 MM
82187600004 + 82187600006	EP LEATHER SOLES, H 48, 3,5 – 4,0 MM AND 4,0 – 4,5 MM

# Safe handling of diisocyanates

## Mandatory training for industrial and professional users of diisocyanates

To ensure that workers across the EU can continue to handle diisocyanates safely, new training requirements are now mandatory under the European REACH Regulation. Companies have to train their employees before 24 August 2023.

## FSK Qualified Training Programme

The FSK conducts the training courses according to your specific needs: Web-based, on-site or hybrid training. The training contents have already been developed together with the manufacturers and importers of diisocyanates in cooperation with downstream users and distributors. They will soon also be available in your language.

## Use the QR code to access the latest information

Find out how to bring your business in line with EU regulations. We support you in ensuring the legal compliance of your products.

For more information on training requirements, please visit: [www.fsk-training.de](http://www.fsk-training.de)

## What are diisocyanates?

Diisocyanates are a family of chemical building blocks used to make a wide range of polyurethane products.

Polyurethane is formed by the chemical reaction between diisocyanates and polyols, which polymerise when mixed together. Polyurethanes would not exist without these two components.

## Why is the training mandatory?

Workplace behaviour is crucial for the safe handling of diisocyanates. If not handled properly, diisocyanates can cause respiratory sensitisation – an irreversible allergic reaction. To address this potential risk, the EU is introducing mandatory training to ensure workplace safety for workers handling diisocyanates.

## How do I know if I need to conduct training?

All industrial and professional users must implement the training requirements by 24 August 2023 to continue using diisocyanates. If you use diisocyanates, you must complete training.

## Where can I find further information?

For further information on training requirements, please visit [www.fsk-vsv.de/reach/schulungsinhalte-reach-diisocyanate/](http://www.fsk-vsv.de/reach/schulungsinhalte-reach-diisocyanate/)
